

Scalability & Future Plan

Date	06 July 2026
Team ID	N/A
Project Name	FinRelief AI – AI-Powered Debt Relief & Financial Recovery Platform
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the developer's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High /Medium/Low)
1	SQLite used for storage	May not scale well with very large datasets	Medium
2	Single-instance backend deployment	Limited concurrent request handling under heavy load	High
3	Basic AI offline fallback only covers placeholder responses	Less personalized guidance without API key	Low

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports a moderate number of users on Render	Deploy with load balancing / horizontal scaling
2	Data Storage	Uses SQLite	Migrate to PostgreSQL for production scale
3	Performance	Standard REST calls	Add caching (e.g., Redis) for dashboard queries
4	Security	JWT + bcrypt	Add refresh tokens, rate limiting, and 2FA

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 1	Credit Score Prediction	1 month	More accurate financial risk insight
Phase 2	OCR-based Bank Statement Analysis	2 months	Automated expense/debt entry

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 3	Voice-enabled AI Assistant	3 months	Improved accessibility
Phase 4	Multilingual Support & Email Notifications	4 months	Wider user reach and engagement
