

Project Initialization and Planning Phase

Date	05 July 2026
Team ID	N/A
Project Title	FinRelief AI – AI-Powered Debt Relief & Financial Recovery Platform
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) report

The proposal report aims to help users track debts and expenses, understand their financial health, and receive personalized AI-generated guidance to become debt-free. Key features include a Financial Health Score engine, an AI-powered debt analysis assistant, and a Snowball/Avalanche repayment planner.

Project Overview

Field	Details
Objective	The primary objective is to help users track debts/expenses, compute a Financial Health Score, and receive AI-driven guidance to become debt-free.
Scope	The project comprehensively develops a full-stack web application using React and FastAPI that manages user finances, computes a health score, generates AI insights, and produces repayment plans and PDF reports.

Problem Statement

Field	Details
Description	Many individuals struggle to track scattered debts and expenses across multiple sources, adversely affecting their financial awareness and decision-making.
Impact	Solving these issues will result in improved financial awareness, reduced debt stress, and an overall enhancement in the user's ability to build sustainable repayment habits.

Proposed Solution

Field	Details
Approach	Employ a rule-based Financial Health Score engine combined with the Google Gemini API to analyze and predict debt risk, creating a dynamic and personalized financial recovery system.
Key Features	- Debt & expense tracking - Financial Health Score (0-100) - AI Debt Analysis & Financial Assistant - Snowball/Avalanche Repayment Planner - PDF financial report generation

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware Computing Resources	CPU/GPU specifications, number of cores	Intel Core i3/i5 or higher CPU

Resource Type	Description	Specification/Allocation
Memory	RAM specifications	8 GB RAM (Minimum)
Storage	Disk space for data, models, and logs	5 GB Free Disk Space
Software Frameworks	Python & JavaScript frameworks	FastAPI, React (Vite)
Libraries	Additional libraries	SQLAlchemy, Pydantic, python-jose, bcrypt, google-generativeai, reportlab, Axios, Recharts
Development Environment	IDE	Visual Studio Code, Python 3.11, Node.js
Data	Source, size, format	User profiles, debts, expenses, AI reports (SQLite database)
