

Project Executable Files

Date	05 July 2026
Team ID	N/A
Project Name	FinRelief AI – AI-Powered Debt Relief & Financial Recovery Platform
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes/No/NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA (SQLAlchemy models auto-create schema)
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	No
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes (Linked in Project Demonstration folder)

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

AI-Powered-Debt-Relief-Financial-Recovery-Platform/

```
|-- 1. Brainstorming & Ideation
|-- 2. Requirement Analysis
|-- 3. Project Design Phase
|-- 4. Project Planning Phase
|-- 5. Project Development Phase
|-- 6. Project Testing
|-- 7. Project Documentation
|-- 8. Project Demonstration
|-- backend/
|   |-- app/
|   |   |-- main.py, config.py, database.py, models.py, schemas.py, auth.py
|   |   |-- ai/ (gemini_client.py, financial_score.py)
|   |   +-- routers/ (auth, profile, debts, expenses, dashboard, ai, reports)
```

```
| |-- requirements.txt
| +-- .env.example
|-- frontend/
| |-- src/ (api/, context/, components/, pages/)
| +-- package.json
+-- README.md
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://finrelief-ai-frontend.onrender.com
Login Credentials (Demo)	Provide demo username and password for evaluator access – register a new account, or use demo credentials if provided separately
Platform / Hosting Provider	Render (Frontend + Backend)
Repository Link	https://github.com/Harivalli/AI-Powered-Debt-Relief-Financial-Recovery-Platform
Demo Video Link	https://drive.google.com/file/d/1-UngA1mqCgYKpksqnnR0BQMAwPEaXRWd/view?usp=drivesdk

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally. Pre-requisites: Windows 10/11, Python 3.11+, Node.js, Git, Visual Studio Code.

- Step 1: Clone the repository.
- Step 2: Open the project folder in Visual Studio Code.
- Step 3: Backend - create and activate a Python virtual environment, run **pip install -r requirements.txt**, copy **.env.example** to **.env** and add your GEMINI_API_KEY.
- Step 4: Run the backend: **uvicorn app.main:app --reload --port 8000**.
- Step 5: Open API docs at **http://localhost:8000/docs**.
- Step 6: Frontend - run **npm install** then **npm run dev** inside the frontend folder.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	AI features require GEMINI_API_KEY.	Offline demo mode provides placeholder AI responses if key is not set.
2	Uses SQLite by default.	Easily configurable for PostgreSQL in production.
