Project Name	FinRelief AI – AI-Powered Debt Relief & Financial Recovery Platform
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • “I don't know how much total debt I actually have.” • “I need a clear plan to become debt-free.” • “I wish someone could just tell me what to pay off first.”	THINKS • Worried about interest piling up every month • Wants a trustworthy, data-backed recommendation • Wants to know if their financial health is improving
PERSONA Working Professional (Debt-Burdened User)	
DOES • Checks multiple bank/loan apps separately • Tracks expenses manually in notes or spreadsheets • Searches online for generic debt-payoff advice	FEELS • Anxious about growing debt • Relieved when there is a clear repayment timeline • More confident after seeing a Financial Health Score
